# Pietra Grey

These 20mm porcelain slabs are a timeless addition to any garden and are a perfect choice for areas like patios, verandas, paths, and driveways. They are made from thick and durable porcelain, but still perfectly replicate natural Belgian stone. They feature realistic graining and tonal elements on their surface design, making it near impossible to tell the difference.

PIETRA GREY • 1200x600x20mm • R11 /PTV+36

# Outdoor Installation

Our Splendour Outdoor porcelain is the perfect contemporary solution for any home as a low-maintenance alternative to traditional wooden decking or natural stone paving.

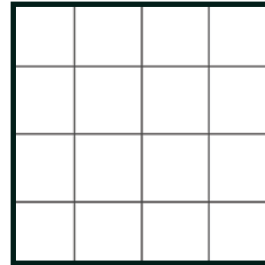

Multiple external fixing methods now allow the quick and easy creation of a fresh, luxurious outdoor living space in almost any area; prep with confidence for all your family entertaining this summer - no project is too big or too small.

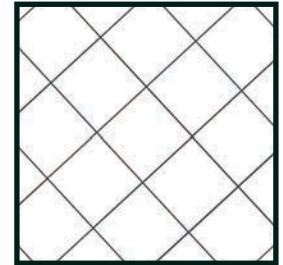

# Making more of your selection

Whilst many people choose a traditional stack bond for their outdoor slabs, its surprisingly easy to generate an interesting twist just by changing up the layout.

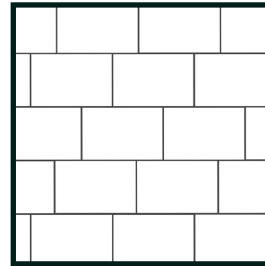

We also recommend considering the shape of your garden, as not every home has a perfectly angled perimeter, so as well as injecting a little sophistication into your selections, opting for a particular fixing layout may also enhance the landscape and prevent drawing attention to any discrepancies.

**STACK BOND**  
Traditional & Simplified

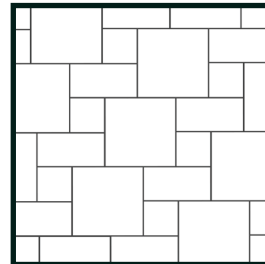

**DIAMOND**  
A Sophisticated Twist

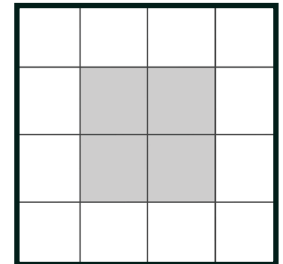

**3/4 BOND**  
Great for Larger Tiles

**HERRINGBONE**  
Perfect for Planks

**MODULAR**  
The Natural Look

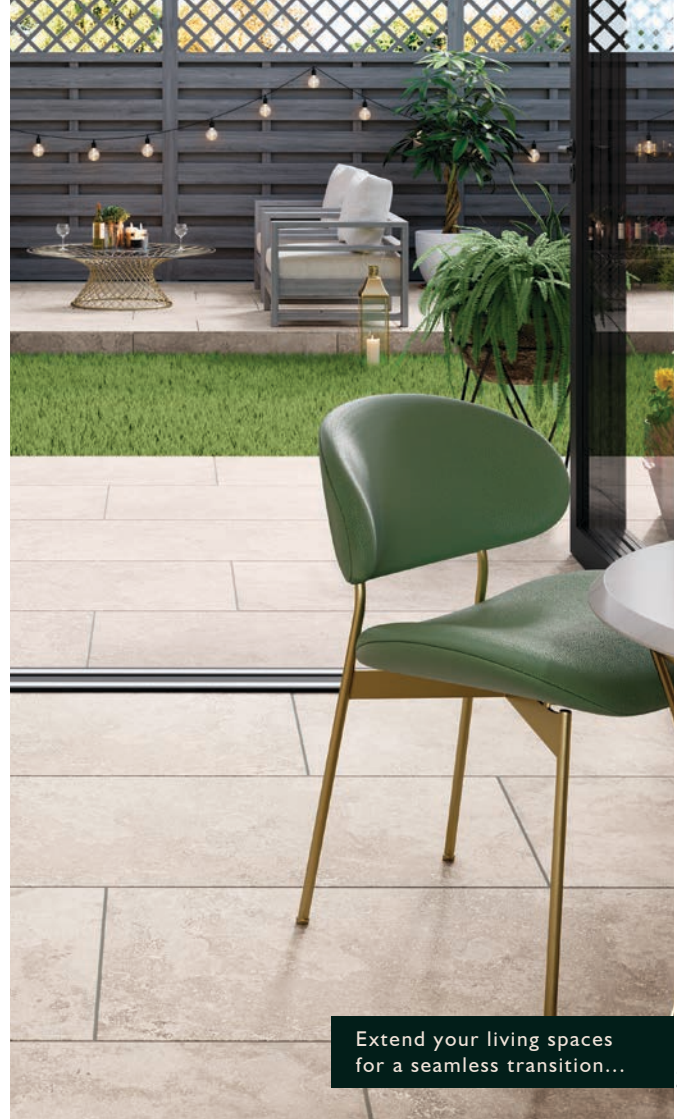

**RUGGING**  
Mix Colour or Pattern

Including pattern is a great way to inject vibrancy..

These days many of us prefer to have a beautiful outdoor space that's as low maintenance as possible; even the smallest space could be converted into a Summer reading nook whilst larger areas can be transformed into more functional areas perfect for entertaining. Whatever the size of your space, Splendour Outdoor can provide you with the perfect outdoor escape...

Extend your living spaces for a seamless transition...

MAPEI ADESILEX P4 20KG  
800932

# Mapei Adhesive

Mapei Adesilex P4 is our high-performance, quick-setting, full-contact cementitious adhesive designed for medium and large-format ceramic, porcelain, and most natural stone tiles. Not only is it an adhesive, but it also has the ability to act as a smoothing compound, perfect for both interior and exterior floors. It is also a great choice for 20mm porcelain tiles.

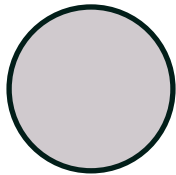

What's special about this product?

- High performance, rapid set, C2F adhesive
- Versatile grey colouring
- Can also be used as a smoothing compound
- Waterproof, weatherproof and resistant to frost
- Suitable for 3-20mm bed depth
- Suitable for interior and exterior uses

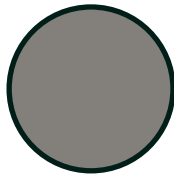

# Mapei Grout

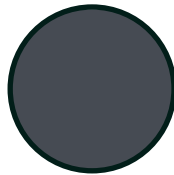

Looking for a high-performance grout that gets the job done efficiently? Look no further than Mapei Ultracolor Plus, a quick-setting and fast-drying cementitious grout perfect for joints up to 20mm wide. Not only is it mould-resistant and water-repellent, ensuring your surfaces stay hygienic and healthy, but it also boasts anti-efflorescence properties for enhanced uniformity of colour.

# Pedestal Installation

Adjustable Support Pedestals are a system that enables the installation of large format porcelain slabs without the need for grout and adhesive. Adjustable Pedestals are a suspended system, meaning that no mechanical fixings are involved and the weight of the slabs holds everything in place. Pedestals allow the creation of a space beneath the paved surface which can accommodate pipes, drainage channels and cabling.

# 20mm Paving Slab Trims

These 22.5mm L-shaped external porcelain paving trims hide and protect exposed edges of the slabs, creating a neat, professional finish. Durable and long-lasting, their straight edge provides a sleek, contemporary look that can be used on both walls and floors.

What's special about this product?

- Protects raw exposed edges from damage
- Hides the edge for a clean, contemporary look
- Durable, long-lasting and resistant to rust
- Can be used on both walls and floors
